Oil on canvas, wooden frame

83 x 63 cm

Claus Hugo Nielsen's paintings and sculptures stimulate the imagination with organic forms that the viewer can give an own meaning to. His paintings show compelling atmospheric images that are raw and direct in their material execution on the one hand, but soft and refined through the colours and compositions on the other. The artworks open them a door to the world of the subconscious and the fears, desires and lust that simmer on a level that even the most advanced supercomputer cannot add up.
