Painting Wall Cabinet

Paintings, wood, hinges

The painting wall cabinet is made from oil paintings painted by unappreciated artists. It invites you to have a look inside. The Dutch are famous for their renowned painters like the 'Dutch masters', but not every Dutch painter made it to international recognition. Many of their paintings ended up stored in attics or cellars. Diederik recognizes the love, passion, time, and effort these Dutch artists putted in their creations. In his view, these paintings contain something more than just its material properties and have a different, unmeasurable value.
