Artist duo V&B (Alex Jacobs & Ellemieke Schoenmakers, founded in 2007) creates sculptures, paintings and installations. Over the years, they have developed a visual language in which form, material and theme are interwoven in a unique way. They consciously create a dialogue between abstract and figurative, between today's visual culture and the art history of bygone times. These are expressions of an endless curiosity about how images, materials and meanings are constantly evolving.
