Designed: 1953

Executed: Søborg Møbler in Copenhagen ca 1955

Marked: unmarked, well documented

Dimensions: Height 70,5 cm, width 130/180 cm, depth 80 cm

A teak and beechwood 'Dropleaf' desk. Designed by the renowned Danish furniture designer Børge Mogensen in 1953. Executed by Søborg Møbler in Copenhagen around the same period.

The desk consist of a solid teakwood desktop supported by a chromed tubular frame. The desk is fitted with a teakwood drawer unit with two drawers with steel handles. The desk folds out through an extension leaf of teakwood supported by an ingenious hinge system.

This desk is one only three designs by Børge Mogensen in which he combined chromed steel and wood. Most of his

designs were made entirely of wood. The combination of materials gives this design a beautiful, light and timeless look.
