Lychee with a cup of tea

Oil on panel, 2026, 40 x 60 cm

This work by Qiangli Liang draws clear inspiration from the tradition of 17th-century Dutch still-life painting. At its centre, a vase reflects the window and the objects arranged across the table, while the details of the cup of tea contrast beautifully with the broad, expressive brushwork of the background. Deep, rich colours and a thoughtful composition give the work a sense of depth and atmosphere.
