Shelter

2025, Ceramic Wall Sculpture
32 x 29 x 20 cm
Unique piece

The series 'Shelters', small ceramic sculptures as well as functional birdhouses. Through vivid colors of the glaze and through their partly geometric and sometimes organic shapes, these sculptures evoke joyful characters. Feipel & Bechameil started to develop the birdhouses with the project 'Cité d'urgences - Apus Apus' and gave been awarded in 2018 the special price of the Jury from the COAL award in collaboration with the Musée de la Chasse et de la Nature in Paris. The birdhouses are dedicated to the species whose survival is directly endangered by the scarcity of their habitat due to our modern lifestyle. The birdhouses aim to offer a new form of housing for the birds and hope to help re-integrated them within our living space and to allow a poetic co-habitation of mankind and other forms of nature.
